

December 20, 2024

To Whom it may Concern:

Effective January 1, 2025, BCI Burke will have increased prices on our products, with an average weighted increase of 3.45%. Additionally, as we have done annually Burke also identified product that required price adjustments due to changes in volume, suppliers or design. These outliers are minimal but did require larger % adjustments.

Burke and Burke's employees have experienced the same inflation pressures as other manufacturers and manufacturing employees in 2024, which required increases to wage rates. Additionally, we have experienced similar increases from many suppliers for the same reasons.

Burke continues to find ways to increase productivity, with investments in technology and manufacturing equipment, reducing waste and controlling our supply chain to minimize the price increase to our customers. These investments and improvements have also allowed us to provide industry best lead times.

Burke's management team, supply chain team and logistics team will continue to work diligently to find opportunities to minimize the price increases to our customers, even in this unprecedented environment related to cost increases. We are committed to providing you with the highest quality playground equipment, industry best service and technical support that delivers peace of mind to our customers.

Thank you for your business.

Sincerely,

Ryan J. Bittner
Chief Financial Officer
