

Alternative transportation that meets your students where they are.

As schools across the country contend with budget restrictions and historic driver shortages, alternative transportation services are a critical supplement to traditional school buses. Via Student Transit empowers districts to offer equitable mobility for all — including McKinney-Vento students, foster youth, students with disabilities and/or an IEP, and students living in difficult-to-serve areas or areas affected by driver shortages. Years of experience serving populations with unique transportation needs coupled with our industry-leading technology provides safe, reliable student transportation.

What makes Via Student Transit different?

Safety first.

Our drivers undergo comprehensive safety training designed for transporting students of all ages and with a wide range of needs.

Trusted transit partner, built for scale.

Via transports hundreds of thousands of passengers each month across 450+ transit services. Our national footprint means we can pick up additional routes fast, because your needs change rapidly.

Caregiver visibility.

Authorized caregivers and administrators are able to track rides in real time, providing transparency and confidence.

1–2 drivers per student.

Students feel more comfortable when they see familiar faces at pickup and dropoff, so we plan our programs with driver consistency in mind.

The ability to track rides in real-time has been a game changer for our caregivers and district staff. And it's given our parent community a real sense of calm.”

— Jayce Cruz, Transportation at Appleton Area School District

Via Student Transit includes everything you need to provide safe, reliable service.

Vehicles and drivers.

We source and maintain safe and accessible vehicles, with the ability to quickly scale as needed. Our team will ensure drivers are sufficiently trained and licensed in accordance with state, local and federal guidelines.

Caregiver technology.

Our tech-enabled communication tools ensure caregivers and authorized district administrators are up to date on student statuses. SMS notifications keep caregivers in the loop with night-before pickup reminders, vehicle arrival time updates, and notifications of any real-time changes.

Dedicated team.

We build our team for your success. You'll work with a Partner Success Manager, general manager, and field manager who provide hands-on support, ensuring your program exceeds expectations.

Data and reporting capabilities.

Our experts can assist with translating your rich service performance data into actionable insights. You can also use our administrative dashboard to investigate individual rides and connect to our 24/7 technical support team.

What students and caregivers are saying:

“

Via didn't try to fit us into a one-size-fits-all model. They worked closely with our team to build a transit program tailored to our needs—from routing students across a wide service area to accommodating variable school start times. What stood out was their flexibility: when we had urgent needs and changes, they adjusted within 24 hours. That level of customization is rare.”

— Transportation Director for Tacoma Public Schools

“

What sets Via apart is their responsiveness. Whether it's a last-minute placement, weather-related route change, or just a quick question—we get a reply in minutes, not days. When our district faced an urgent need, Via mobilized backup drivers overnight. They've consistently gone above and beyond, they're a true partner.”

— Case Worker for El Paso County
